

India is best among G20 nations in climate index

PRESS TRUST OF INDIA

New Delhi, 22 November

India is ranked among the top five countries, and the best among the G-20 nations, under the global Climate Change Performance Index (CCPI), an official statement said.

The index is published by German Watch, New Climate Institute and Climate Action Network International based in Germany.

The CCPI aims to enhance transparency in international climate politics and enables comparison of climate protection efforts and progress made by individual countries. "India has been ranked amongst top five countries in the world, and the best among the G20 countries, based on its Climate Change performance," a power ministry statement said.

India jumped two spots, and is now ranked eighth as per the CCPI, it stated. The report, released at COP27, shows Denmark, Sweden, Chile and Morocco as the only four small countries that were ranked above India at fourth, fifth, sixth and seventh, respectively.
