

# Maruti upgrades vehicles to meet BS6 norms

**Our Bureau**  
New Delhi

Maruti Suzuki India (MSIL) said it has upgraded its vehicles to meet the stricter emission norms under the BS6 regime, including its Hatchbacks, Sedans, MPVs, SUVs and commercial vehicles.

All its vehicles are now compliant with the new BS6 Phase-II real driving emissions (RDE) regulations, and are compatible with E20 fuel as well, it said. The new RDE-compliant Maruti Suzuki

cars feature an enhanced on-board diagnostics (OBD) system to monitor emission control systems real-time and will notify drivers in case of any malfunction.

## **SAFETY FEATURES**

The new Maruti Suzuki BS6 Phase II-compliant cars have also been given a significant safety update with Electronic Stability Control (ESC) system, which is capable of detecting when a driver is losing vehicle control.

"The government's drive to incorporate the new BS6 Phase II norms will go a long way in controlling emissions from vehicles. Maruti Suzuki also took the opportunity to delight customers by equipping our cars with ESC. With this, Maruti Suzuki cars and SUVs are now safer than ever before and better for the environment," CV Raman, Chief Technical Officer, MSIL, said.
