

# Fresh talks with industry on EV battery swap soon

NITIN KUMAR

New Delhi, 26 September

---

The Centre is planning to initiate fresh consultations to finalise interoperable standards for battery-swapping policy of electric vehicles (EVs), *Business Standard* has learned.

As part of this endeavour, the

Ministry of Heavy Industries will hold a meeting

on September 29 with industry stakeholders.

The objective of the meeting is to streamline the standards for battery-swapping technology, ensuring compatibility across various EV models and charging stations.

“The meeting is called to bring all the industry stakeholders together on battery interoperability standards. We want to bring the revised battery-swapping policy soon,” a senior government official said.

The Ministry of Heavy Industries has invited representatives from the India Battery Swapping Association (IBSA), India Energy Storage Alliance (IESA), Society of Indian Automobile Manufacturers (Siam), Invest India, Niti Aayog, and the Ministry of Power for the meeting.
