

DGFT notifies policy on export of certain goods

THE COMMERCE MINISTRY on Wednesday notified a policy for general authorisation for the export of certain telecommunication-related and information security-

related items under a SCOMET category to grant one-time bulk licences. A detailed procedure for these authorisations has also been notified by the Directorate

General of Foreign Trade (DGFT). Special chemicals, organisms, materials, equipment and technologies (SCOMET) items are dual-use goods. The applicant exporter

will have to submit an application for getting a one-time license through the online SCOMET portal and attach the information in the prescribed format.
